

January 5, 1978

the involvement of so many members of the Legislature that they all should be a participant in the sponsorship of the bill. So even though the bill is sponsored by the Banking, Commerce and Insurance Department, those Virgin Islands just kind of take it out of you, so even though our committee is sponsoring the bill, we have afforded any Senator who wanted to put his name on the bill, particularly Senator Bereuter who did an awfully lot of work in this area, some of the other people in here, the opportunity to sign it. However, to be technically correct, avoid any confusion or misunderstanding, I made a motion that the Rules be suspended so that their names can be properly added and that is all this is.

PRESIDENT: That is your first motion.

SENATOR DeCAMP: Yes.

PRESIDENT: All right.

SENATOR DeCAMP: Why, does it need two motions?

PRESIDENT: Yes.

SENATOR DeCAMP: Why?

PRESIDENT: The second one, don't you also want the...

SENATOR DeCAMP: I just suspended them all in one motion, Rule 5, section 4 and 5 (d).

PRESIDENT: Senator Warner requested a separate vote on it. The Chair agrees that they are separate issues. Senator Chambers. The first issue only, Senator Chambers.

SENATOR CHAMBERS: Mr. Chairman and members of the Legislature, so that it is clear that I am addressing myself in a very broad and general way to the first issue which is the suspension of a rule to grease the skids to try to get everybody to sign that bill so that there will be no debate and it can slide through and people running for office who obtain money, perhaps, through the medical malpractice bill can now do it from the manufacturers, and in the same way that this body was bamboozled, buffaloed, and bulldozed by the doctors into doing something that turned out to be improper, and which some of you later said you had regrets about, you are being asked to turn around and do the very same thing now. But we are going to debate this bill, and those who signed it are going to, I presume they are going to answer questions and show that they know all that Senator DeCamp says that they know about products liability. They have studied the issue. They have offered input and that is what everybody who is now been buffaloed and tricked into signing that bill is going to have put out as a representation today. I will tell you frankly, Senator DeCamp, I don't believe that what you said is true. I don't believe that that many Senators ever take the time to evaluate an issue as complex as this one, and if they have had somebody tell them something, it is probably a manufacturer who is dealing in nursery rhymes and fairy tales like you won't even find in Alice In Wonderland or Hollywood. I think you ought to be cautious in committing yourself to a proposition right now which you don't even understand.
